Culture Suggestions

For Greenhouse and Outdoors

Work soil at least 18 inches deep; use liberal amount of well decayed manure. Cow manure is best. Use sprinkling of lime and bone; Soak seed in water for about 24 hours or until swelled up and then plant about 1½ to 2 inches deep in a well firmed soil that is good and moist, but not sticky. (DO NOT SOAK WHITE SEEDED VARIETIES).

In recent years a copper oxide preparation has frequently been dusted on sweet pea seeds to prevent damping off, the same proving very satisfactory. This can be procured at most seed stores under various names. Inoculation of seed is also highly successful.

Peas will not do well in too loose a soil. Plant one inch apart and later thin to about six inches. Do not water until seeds have begun to germinate. After germination has taken place give good soaking. MOST FAILURES ARE CAUSED BY WATERING BEFORE SEED HAS SPROUTED. If weather is hot use some kind of shading. Protect young plants from birds outdoors. Look for Green Aphids regularly as this insect is the worst enemy. Spraying with nicotine, one part nicotine to 400 parts water with spray gun is best. There are also many other good insecticides which are excellent for the control of Aphids. Give young plants substantial supports in order that they may climb and produce good flowers. Poor flowers with crooked stems are worthless. Liquid manure feeding after they come in bloom will lengthen the flowering period and produce better flowers. Pick all flowers as this also lengthens the flowering period. Always keep the surface earth loose and never allow a crust to form. If grown indoors keep ventilators open to keep the air as dry as possible. A house that is kept damp and sultry will cause too much growth and the sweet peas will not bloom as soon as they should, and then will begin to bloom too high up. Early sweet peas usually bloom from 75 to 100 days after seed is planted. Many nurseries start sweet pea seeds by germinating in Vermiculite and then selling germinated seed or pot them for sale. Sterilize soil before planting if you have root rot trouble.

CONDITIONS OF SALE

Send your orders as soon as possible after receiving catalog to insure prompt delivery. Orders are filled the same day we receive and we exercise the utmost care in filling orders.

Owing to the handling of other flower seed not raised by us we are compelled to use the seedsman disclaimer.

WILLIAM ZVOLANEK & CO., give no warranty, expressed or implied as to description, quality, productiveness or any other matter of any seeds we sell and we will not be in any way responsible for the crop. If purchaser does not accept seed on these terms they are to be returned immediately and the money paid for same will at once be refunded.

Any questions in regard to growing will be cheerfully answered. In case of shortage or crop failure we will take the liberty of substituting with the best and nearest color. If this is not wanted, mark your order "No Substitute."

TERMS

A 6% discount will be allowed on all orders with remittance enclosed and all such orders will be sent postpaid to any part of the postal union, or Canada. Orders not accompanied with remittance, postage will be added and if party is not known will be sent C.O.D., unless other arrangements are made in advance. To insure delivery of foreign orders, postal money order should accompany order with postage added or we cannot be held responsible for delivery. ALL FOREIGN ORDERS MUST BE AT PAR WITH U. S. CURRENCY.

If you wish seed to be sent via airmail allow extra for postage. 12 cents for 1st oz. 6c each additional oz. up to 8 ozs.

Ask for our Special Prices on lots of 10 lbs. or more.

If your shipment does not arrive within two weeks on the east coast, please notify us immediately.

THE WORLD'S BEST THE ZVOLANEK SWEET PEAS

Originated and introduced by William Zvolanek in 1950 after 11 years of hybridizing and selection. Three types are now listed and described.

**ZVOLANEK'S EARLY MULTI-FLORA
ZVOLANEK'S SPRING FLORI-BUNDA
ZVOLANEK'S LATE PLENTI-FLORA**

Each is described separately in this list. These Multi-flowering sweet peas are now known all over the world as the finest for heat resistance, vigor and 5 to 8 flowers and more on exceedingly long stems. All Florists, Nurserymen, and Home Gardeners who have grown these marvelous sweet peas will grow no others. Nurserymen often sell plants grown from seed direct to the home gardener. Whenever grown for Flower Shows they have no equal and always win in competition as they are far superior.

When grown outdoors they will last all summer and produce loads of flowers. In greenhouses when planted in August and September they will bloom from Christmas until well after Easter. In Southern California and Southern States they are usually planted out-doors in September and October depending on frost conditions.

Each season we have introduced new improved colors and have sent seed all over the world wherever it is possible. Already some firms do not list these Multi-flowering sweet peas as Zvolanek's, which is unfair to us. Do not accept these Multi-flowering sweet peas as genuine unless listed as ZVOLANEK'S SWEET PEAS. We consider it UNFAIR PRACTICE if listed otherwise. If not listed as above we suggest that you order DIRECT FROM US to get the GENUINE SEEDS.

Many times we have been asked about the difference of Zvolanek's Spring Flori-Bunda and Cuthbertson Flori-Bunda sweet peas if any. Zvolanek's Spring Flori-Bunda type was released one year before the Cuthbertson Flori-Bunda and is taller growing with the usual 5 to 8 flowers on very long stems. The Cuthbertson Flori-Bunda type is more bushy bred to have 4 and 5 flowers per stem. They are entirely different from one another. We have both types in our trial grounds to show visitors the difference.

Our sweet pea fields are usually in full bloom about June 1st and visitors are always welcome to inspect and see the riot of colors.

**BUY THE WORLDS BEST FORM A SPECIALIST
THE ZVOLANEK SWEET PEAS**

Thanking you and trusting we may again be of service with our fine sweet pea seeds, we are

Very sincerely yours,
WILLIAM ZVOLANEK & CO.
William Zvolanek, Prop.

We are revising our mailing list this year. If you have not ordered and wish to stay on our mailing list please advise us to be retained.

ATTENTION TO CALIFORNIA GROWERS

A 3% Sales Tax must accompany all orders from California, unless you have a sellers permit number from the California State Board of Equalization. If you have a sellers permit number, place same on your order which will exempt you from the above Tax. We must have a record of your number on file at all times. Out of state orders tax exempt. Please send sellers permit number with order or add Sales Tax.

THE ZVOLANEK SWEET PEAS

We consider it UNFAIR TRADE PRACTICE by any firm listing our three types of MULTI-SWEET PEAS by any other name than the ZVOLANEK SWEET PEAS.

ZVOLANEK MULTI-FLORA (Early)

ZVOLANEK FLORI-BUNDA (Spring)

ZVOLANEK PLENTI-FLORA (Late)

Mr. William Zvolanek is the originator and introducer of all three. Several firms are now listing these by their firm name. Please do not accept by any other than the ZVOLANEK SWEET PEA.

ZVOLANEK'S MULTI-FLORA (EARLY)

This is the early Multi-flowering type and is grown by all florists for winter bloom under glass. They are also grown outdoors all over the U.S., Canada and foreign countries. For outdoors they are especially useful where the summers are short and where other sweet peas do not thrive. Also for all the southern states for extra early bloom. These are the all year around sweet peas that can be planted any time and will bloom in about 75 days after planting depending on weather conditions. They will bloom earlier than any other sweet peas outdoor. Are just as heat resistant as any other sweet peas. All colors are now improved. 5 to 8 flowers on very long stems.

NEW VARIETIES OF ZVOLANEK'S EARLY MULTI-FLORA

ZVOLANEK'S HUNTSMAN — Large brilliant Crimson

ZVOLANEK'S FIRE GLOW — A fine glowing orange

ZVOLANEK'S COQUETTE — Pink and white bi-color standards, deep pink wings and keel white, very long stems.

ZVOLANEK'S NAVY BLUE — A fine deep navy blue.

ZVOLANEK'S CREAM CLOUD — Giant deep cream white seed.

ZVOLANEK'S DELIGHT — A fine medium rose pink, lighter than Dancer.

Price on each ½ oz. \$1.75; 1 oz. \$3.00; 4 ozs. \$10.00

THE ZVOLANEK SWEET PEAS

ZVOLANEK'S FLORI-BUNDA (SPRING)

ZVOLANEK'S FLORI-BUNDA (spring) type is for outdoor planting and is classed as an earlier late flowering. Blooms two weeks earlier than the Zvolanek Plenti-flora (Late). It is also often planted under glass by florists in November and December and will bloom as early as April but not during the winter months. All are strong growers and heat resistant. 5 to 8 flowers on very long stems.

NEW VARIETY ZVOLANEK'S SPRING FLORI-BUNDA

ZVOLANEK'S FRAGRANT PINK — Very fragrant rose pink.

In 1954 Flower Show in England. Multi-Flora exhibit put on by Mr. Frederick Evans, Nuneaton, Warwickshire, England.

THE ZVOLANEK SWEET PEAS ZVOLANEK'S PLENTI-FLORA (LATE)

ZVOLANEK'S PLENTI-FLORA (Late) is the summer flowering type which is always planted outdoors and blooms two weeks later than the Zvolanek Flori-Bunda (Spring). Growth is very strong and lush. Does well everywhere outdoors. This type is extensively used in England and all over Europe and is standard over there. Will not bloom in winter. Order from December to March. 5 to 8 flowers on very long stems.

Tall growing and very ruffled. A fine cut flower.

Price 1 oz. \$2.50; 4 ozs. \$8.00

A few unsolicited letters to show how our Zvolanek Multi-Flowerings sweet peas do in different sections of country. We also wish to thank our friends for all the wonderful letters which we are unable to print this season.

Dear Sirs: Had wonderful sweet peas last year. Picked them until the frost came.

MRS. JAMES RING, Olean, N.Y.

Dear Friends: Looking forward to again having the most beautiful sweet peas to be found anywhere.

MRS. WM. W. WORSTER, San Gabriel, Cal.

Dear Sirs: I planted your sweet peas last year and took first at two flower shows. We think they are wonderful.

MARGARET MONTPETIT, Creston, Mont.

Gentlemen: We have raised this variety of sweet Peas the last two summers and they certainly are the finest we have ever seen. They usually bloom for about eight or nine weeks.

WAYNE JESTER, Crawfordsville, Ind.

Dear Sirs: Your sweet peas which you sent to us last year in Taichung, Formosa were a great success. No one in the city seemed to have tried growing sweet peas, but our flowers were very beautiful; many blossoms on long stems. After growing your sweet peas on the mainland of China and Formosa we are now retiring on our home acres in Ohio. I am hoping to have your sweet peas making a grand showing in our garden for many years.

BLANCHE A. WIAINT, St. Paris, Ohio

Dear Sirs: I have been very pleased with the Multi-flora sweet peas, I have been getting from you the last few years. Last year you sent some samples of the Flori-Bunda. I found them very good. I grow them on a single stem (Cordon System) and had one pink plant that gave me 32 inch stem with 13 flowers, besides growing 15 feet high. Had to take it down and carry it along the row and up again to the top of my 8 foot stakes. This same plant gave me 9 flowers regularly; the others usually 7 and 8 flowers over 24 inches long.

O. K. HONEYFORD, Vancouver, B.C., Canada

Gentlemen: We have used your sweet peas for the past six years and couldn't think of using any others.

MRS. A. C. HILLAN, Booding, Idaho

Dear Sir: You will be interested to know that your so very famous sweet pea seed has been sown and already is 6 feet high and flowering profusely. Truth to tell, although we have been in the nursery business for many years, we have never seen such prize winning sweet peas. In the district where we have them growing, the winter is very mild, only an occasional frost, and I may add that we do not use artificial fertilizer whatsoever. Sweet peas with six and more blooms to a stem are totally unknown in our locality.

MRS. B. A. MOORE, Sydney, N.S.W., Australia

Gentlemen: We are doing much better with our sweet peas since we started using your Zvolanek Multi-Flora type, much longer stems and more flowers to a stem. Used to put 40 to 50 stems in a bunch to make a showing, now 25 to 30 make a better showing with the Zvolanek Multi-Flora Strain.

SPRINGVILLE FLORAL CO., Springville, Utah

Dear Sirs: I tried your Zvolanek Multi-flora sweet peas for the first time last year and they were indeed beautiful. As we are North of the 53rd parallel, our summers are short, but the daylight hours are long and growth is very rapid. Your sweet peas grew to a height of eight feet and had an abundance of bloom until frost took them in October. The stems were long and strong with from four to eleven lovely blooms per stem.

MRS. J. HARWOOD, The Pas, Man., Canada

SOME UNSOLICITED LETTERS

Dear Sirs: I had the best sweet peas I ever had grown from the seeds I bought from you. Last year they were wonderful and I had sweet peas until September.

WILLIAM ITTNER, Auburn, Maine

Dear Sirs: I have tried other sweet pea seeds for two years and am back again so there is no comparison.

MARSHALL FLORAL CO., Marshall, Mo.

Gentlemen: I grew the above (Zvolanek Multi-flora) last year and they were the finest sweet peas I have ever seen.

R. DELALAND, Lloydminster, Sask., Canada

Dear Sirs: There are no sweet peas to compare with yours.

SLUSHERS GREENHOUSE

Dear Sirs: Never have I had such beautiful blossoms and long stems as this year. Of course I had to measure some of the stems which were longer than I had ever grown; 22 inches long and 7 and 8 blossoms to the stem was hard to believe, but true.

MRS. N. E. KINNEE, Fresno, Cal.

Dear Sirs: I want to tell you how lovely they were. My friends were amazed at the number of flowers and we would hunt over them to see how many flowers and on many of the white has as high as eleven flowers. In every way they were just wonderful.

MRS. A. G. KNOLTY, Redding, Cal.

Dear Sirs: The Zvolanek Multi-flora really does very well - big beautiful flowers. Alaska grows such a variety of beautiful flowers.

MRS. I. SANDVIK, Pahner, Alaska

Dear Sirs: Thanks for the best long stem Sweet Peas I have ever seen.

CHARLES C. BURLETT, New Orleans, La.

Gentlemen: Still cutting sweet peas of your seed at frost time, months after the other kinds were gone.

H. F. BLOCHBERGER, Tacoma, Wash.

Gentlemen: For ten years we have tried to grow sweet peas in this section and always with varying degrees of failure. Last spring we planted your sweet peas and had beauties up until September 1. On August 15, after two weeks of 90 degrees temperature we picked from a single 7 foot row twenty four dozen sweet peas. At their peak their stems were 12 to 18 inches long with 5 to 7 florets - the individual florets larger than any I have ever seen growing under glass.

MRS. C. MERLE DIXON, Ann Arbor, Mich.

Dear Sirs: These are the best seeds I have been able to plant for several years. Your seeds grow wonderful at this 8000 feet altitude; we had lots of blooms last year with 8 flowers.

E. F. KNAPPENBERGER, Del Norte, Colo.

Gentlemen: They are outstanding. They bloom 10 to 14 days sooner than others. Have had some with 16 inch stems, very sturdy. They all have 5 to 8 florets and grow to 10 feet in height; bloom until heavy frost, best of all they are very fragrant. What a thrill to pick these long stemmed beauties two or three times a week.

MRS. E. J. LORONGER, Virginia, Minn.

Dear Sirs: Two years ago I had some of your seeds and they surely were nice. Had stems 18 inches and as many as 8 flowers on a stem.

ARTHUR LENGEL, Audubon, N.J.
